Experts in Ecommerce & ERP Solutions

PROBLEM STATEMENT

Acumatica is built on the Cloud xRP platform, offer extensive customization and integration capabilities over a variety of technologies. Several integrations have been built from Acumatica leveraging these capabilities. Some of these integrations are to ecommerce platforms and retail systems.

While most of the commerce/retail systems have similar integration requirements. When it comes to Acumatica, each of these integrations handles it differently requiring complex and expensive maintenance and upgrade activities.

SOLUTION OVERVIEW

With Kensium Commerce Framework (KCF), Kensium provides a unified framework for integrating Acumatica with commerce/retail systems. This reduces the complexity of the integration by moving all the common integration components to the framework allowing each integration to focus only on the elements that are unique to that integration.

KCF integration with Acumatica empowers customers with API access to multiple commerce platforms, facilitating real-time data synchronization, seamless omnichannel commerce, and consistent shopping experience.

KCF provides an adaptable solution by leveraging existing commerce connector configurations while allowing developers to create custom plugins and configurations as needed to be compatible, meeting the business requirements.

HOW IT WORKS

1. Install the core KCF integration.
2. Install the appropriate retail / commerce plugin.
3. Setup connectivity with the retail / commerce system.
4. Implement data mapping for the various entities.
5. Enable the syncs to keep your Acumatica ERP in sync with your commerce/retail system.

KEY BENEFITS

1. Reduced complexity of integrations.
2. Common framework across multiple systems reduces the maintenance efforts.
3. Continuous enhancement of the framework as new systems get integrated.
4. Centralized data management for multiple platforms.
5. Reduced system load as multiple integrations can be notified via a single push.
6. Real-time capabilities.
7. Stay current with the latest versions of Acumatica. and obtain faster certifications for your solutions.
